the priority program the educational quality of schools has been established seven years ago by the german research foundation dfg the
 projects in this program investigated conditions inside and outside of school and their impact on the development of mathematical scientific
 and cross curricular competencies in this book major findings of the program are presented the projects not only give an overview of their
 research questioning methods and findings but also of approaches and materials that have been developed to support learning and teaching
 in mathematics and science class rooms the studies reported here identify factors for weaknesses in the educational outcomes that became
 apparent in the international comparisons like timss and pisa the projects however provide empirically substantiated units on approaches
 that can help to improve the educational quality of schools publisher ed

this book discusses the importance of identifying and addressing misconceptions for the successful teaching and learning of science across
 all levels of science education from elementary school to high school it suggests teaching approaches based on research data to address
 students common misconceptions detailed descriptions of how these instructional approaches can be incorporated into teaching and
 learning science are also included the science education literature extensively documents the findings of studies about students
 misconceptions or alternative conceptions about various science concepts furthermore some of the studies involve systematic approaches to
 not only creating but also implementing instructional programs to reduce the incidence of these misconceptions among high school science
 students these studies however are largely unavailable to classroom practitioners partly because they are usually found in various science

education journals that teachers have no time to refer to or are not readily available to them in response this book offers an essential and easily accessible guide

this book is innovative and original in assisting the reader to apply the principles of science to paediatric practice professor neena modi former president royal college of paediatrics and child health the science of paediatrics mrcpch mastercourse provides essential background preparation for the mrcpch theory and science examination it contains an up to date review of the application of science to everyday paediatric clinical practice whether it is interpreting clinical signs or investigations prescribing drugs or identifying best management although this understanding is essential in order to make informed clinical decisions it is difficult to obtain as it is not usually covered in clinical textbooks mrcpch exam format questions embedded in each chapter to test understanding emphasis on embryology to explain many congenital abnormalities an overview of the relevant anatomy and physiology focus on the application and interpretation of investigations examples of recent advances in science and clinical research that have benefitted the children's care all clinical specialties covered by paediatric specialists chapters covering evidence based paediatrics statistics ethics and quality improvement

designed for medical students on their clerkship rotation this new edition of mksap for students 4 includes more than 400 new patient centered self assessment questions and answers focused on important internal medicine information from the core medicine clerkship curriculum guides training problems the accompanying cd rom automatically tracks progress assesses areas for further focus enables category based and random question ordering and links directly to pubmed

acquiring knowledge is a life long process we constantly need to keep abreast of developments and progress in science and other disciplines embracing a scholarship of teaching and learning sotl means practicing constant self reflection involving evaluation of the academic career and the ways in which strategies are designed to examine interpret and share learning about teaching this practice not only yields benefits to the lecturer but also enriches the scholarly community in the discipline in general sotl is regarded as a vibrant practice of ongoing self criticism and sharing which results in accumulated teaching experiences for teachers students and the teaching community at large this

book is a contribution from authors sharing their experiences how their teaching portfolios reflect their personal development as teachers and how their teaching experiences are embedded in the scholarship of teaching and learning
