is the human society fair and fulfilling as you learn in school or it is harmful with corrupt politicians financial cartels and major conspiracies spanning the world as you always notice both are the case yet the human society improves gradually despite of all corruption in the news only that the media tends to highlight politicians in order to capture the masses or you never watch the news because it is always a show even in the news while everybody is happy but is society actually corrupt and harmful the human society has always been exploitive yet people tend to interact in any manner in the world more or less humane while it is meaningful to distinguish your own influence exactly as it is would you like to learn the truth about the human society then study yourself and those around very well since society is the direct interconnectivity of all human beings with you in it therefore you are the one defining society directly at least in everything regarding you and this is the case with everyone else while everybody is relatively good intentioned in society since we are very similar through our human nature and through all natural living needs and meanings that we fulfill because humanity is never divided into the good and the bad since everybody is good by having similar natural needs and meanings only that people can become more exploitive while fulfilling consensual needs as these make them be whatever their superiors jurisdictions and ideologies desire stepping in this manner outside the actual human nature and this is bad since this is exactly how humans become unhuman with all dreadful consequences manifesting in the world because humans fulfill mostly consensual needs

as orders and duties coming from above but not their own human needs as everyone should while this ends up defining the human society the most changing it altogether into a social machine meant for profit and exploitation and it should never be the case in a human world because there are two human societies to consider the natural intelligent human society that everyone seeks to have and maintain through their own living natural needs and feelings and the consensual society actually instated in the world regardless if you want it or not throughout this book we study how life and living human beings gather naturally to form classes of life and living societies meant to make life better safer meaningful and therefore fulfilling we also understand the current human society in its consensual structure and characteristics in all aspects and from all perspectives furthermore we identify and understand the various modes of society that life and the environment may demand as we recognize what is meaningful among orders agendas and conspiracies already implemented or threatening to take place in the world who the main social actors are and how determined they remain in everything that they do in the human society this helps you understand your own meaning in life in society and in the world while understanding how your meaning is enhanced or altered by your own behavior and interconnectivity in life and in the world if you seek to uncover and understand the human society exactly as it is and as it should be this book is for you

this book describes the formation of civilized society from the perspective of the analysis of the role played by language and media and hence explains the formation and evolution of the capitalist society from the perspective of language and media it argues that linguistic presentations given by using language serve as a basis for humans to define the private property right to engage in market exchange to establish wage labor system to exploit science and technology in production and to organize socialized production it clarifies the reason for the distinction between the rich and the poor in the capitalist society in a special way against marx s theory of surplus value and asserts the wage labor system is a cooperative system it also discusses the relations of social classes and the relations between democracy and dictatorship as well as the origin of the state from the perspective of language and media different from marx s view in these respects it offers a unique view about the capitalist society this view may help humans deepen their understanding of capitalism

in this book author svein olaf thorbjørnsen probes the question what is at stake for human beings in a society dominated by competition particularly economic competition is competition endemic to human nature does it preserve the dignity and intrinsic value of the human being does it secure better living conditions in a way the answer to these queries is a simple yes it can allow for superior satisfaction of fundamental needs legitimate self love and self realization and encourage positive feelings upon mastering a skill at the same time however competition can also contribute to a strong materialistic self interest and support classicism social ranking and elitism other human beings become only means to a personal success thus jeopardizing fellowship and collaboration in a hyper competitive environment some of the same positive human values mentioned above self love self realisation individuality and freedom can be viewed to pose a threat to the realisation of one s potential and to one s true humanity these competing contradictory aspects of competition are presented and discussed from perspectives across varying disciplines from social anthropology and economics to history ethics philosophy and theology

the authors assert that traditional sociological theories of human nature and society do not pay sufficient attention to the evolution of big brained hominoids resulting in assumptions about humans propensity for groupness that go against the record of primate evolution when this record is analyzed in detail and is supplemented by a review of the social structures of contemporary apes and the basic types of human societies hunter gathering horticultural agrarian and industrial commonplace criticisms about the de humanizing effects of industrial society appear overdrawn if not downright incorrect the book concludes that the mistakes in contemporary social theory as well as much of general social commentary stem from a failure to analyze humans as big brained apes with certain phylogenetic tendencies this failure is usually coupled with a willingness to romanticize societies of the past notably horticultural and agrarian systems
